a comprehensive mathematical and computational modeling of co2 geosequestration and compressed air energy storageenergy and environment are two interrelated issues of great concern to modern civilization as the world population will soon reach eight billion the demand for energy will dramatically increase intensifying the use of fossil fuels ut

annual reports in inorganic and general syntheses 1973 presents an organized annual summary of synthetic developments in inorganic chemistry and its related areas the book covers the synthetic aspects and structural or mechanistic features of elements including the main group hydrides alkali and alkaline earth elements boron aluminium gallium indium thallium silicon germanium tin and lead nitrogen phosphorus arsenic antimony bismuth chalcogens halogens and pseudohalogens and noble gases the text also discusses the synthetic aspects and structural or mechanistic features of elements of yttrium scandium lanthanides and actinides titanium zirconium hafnium vanadium niobium tantalum chromium molybdenum tungsten manganese technetium rhenium iron cobalt and nickel the chemistry of ruthenium osmium rhodium iridium palladium platinum copper silver gold zinc cadmium and mercury is also encompassed the book concludes by describing the synthesis and structures of metalloporphyrins chemists chemistry students and people working in chemical laboratories will find the book invaluable

most people would agree that it makes sense to tax a company that pollutes in a way that directly reflects the amount of environmental and social damage it has done yet in practice such taxes are fraught with difficulty and have far reaching implications a company facing a new tax may lay off workers for example exacerbating an unemployment problem this volume

focuses on such external issues and examines in detail the trade offs involved in designing policies to deal with environmental problems reflecting the broad nature of the subject the contributors include leading economists in the areas of public finance industrial organization and trade theory as well as environmental economists integrating both theoretical and empirical methods they examine environmental policy design as it relates to location decisions compliance costs administrative costs effects on research and development and international factor movements shedding light on an extraordinarily complex and important topic this collection will be of interest to all those involved in designing effective environmental policy

a practical manual for clinicians in the care of critically ill patients this volume covers nephrology neurology obstetrics care pain agitation and delirium perioperative assessment procedures pulmonology radiology and toxicology

target shooters handgun hunters collectors and those who rely upon handguns for self defense will want to pack this value loaded and entertaining volume in their home libraries shooters will find the latest pistol and revolver designs and accessories plus test reports on several models the handgun becomes an artist s canvas in a showcase of engraving talents the catalog section with comprehensive specs on every known handgun in production includes a new display of semi custom handguns plus an expanded illustrated section on the latest grips sights scopes and other aiming devices directories offer easy access to products services and manufacturers

addressing the persistent environmental threat of organic chemicals with a fresh approach to degradation and transformation processes organic chemicals in the environment mechanisms of degradation and transformation second edition examines a wide range of compounds as well as abiotic and microbiological reactions mediated by microorganisms the book emphasizes the pathways used and the broad classes of enzymes involved it provides an overview of experimental procedures with detailed coverage of the organic compounds that

are considered to be xenobiotics the book begins by providing a broad perspective on abiotic and biotic reactions including the significance of a range of environmental determinants the following chapters briefly introduce experimental procedures and emphasize those procedures for establishing the structure of metabolites using isotopes and physical methods next the authors outline details of biochemical reactions involved in the biodegradation of the major groups of aliphatic carbocyclic aromatic and heterocyclic compounds they end with coverage of bioremediation that has attracted increasing concern because of the hazard presented by the disposal of unwanted chemicals or by products from their manufacture broad and comprehensive this book provides a cohesive treatment of the subject it contains an extensive set of literature references and numerous illustrative figures the authors use a mechanistic approach with emphasis on the pathways and the principles that emerge provide a guide not only for specific compounds but also for those having a more remote structural resemblance
